Sihao Liu

Research Scientist, Architecture Research Group, NVIDIA Research

liu@sihao.me | sihao.me | SihaoLiu | LinkedIn | Google Scholar

Research Interests

- Programmable spatial accelerators, hardware/software co-design, compilers, and on-chip interconnects.
- Agentic chip architecture and electronic design automation; independently reviewed and executable engineering workflows.

Education

2026 • **Ph.D. in Computer Science** — University of California, Los Angeles

Degree awarded September 2026. Advisor: Tony Nowatzki.
Dissertation: Loom: Full-Stack Compilation and Automated Exploration of Heterogeneous Multi-Core Spatial Accelerator Systems.

2021 • **M.S. in Computer Science** — University of California, Los Angeles

2019 • **B.Eng. in Electrical Engineering** — Xi'an Jiaotong University

Professional Experience

09/2026–present • **Research Scientist — NVIDIA Research**
Architecture Research Group. Research on next-generation chip architectures and agentic systems for hardware design.

06/2022–10/2023 • **Hardware Engineering Intern — SiFive**
Memory management unit ownership; load/store and cache subsystem design and verification. Full-time summer and part-time academic-year appointments.

Summer 2021 • **CPU Microarchitecture Intern — Futurewei Technologies**
RISC-V vector CPU research and FPGA platform development.

Academic Experience

2019–2026 • **Doctoral Researcher** — UCLA PolyArch Research Group

2018 • **Undergraduate Researcher (summer)** — UCLA PolyArch Research Group

2017 • **Visiting Scholar (summer)** — University of Lausanne
Neuroheuristic Research Group. Supervisor: Alessandro E. P. Villa.

Research Projects and Open Source

2026 • **Loom**. A compiler and exploration framework for heterogeneous multi-core spatial accelerators, connecting a shared hardware model, compilation, simulation, and reproducible evaluation.

Open source • **Humanize / Humanfia**. I created Humanize I at UCLA: an implementation and independent-review loop for coding agents. I contribute to Humanfia, where we extend this approach to longer engineering tasks.

2025–2026 • **OverNoC / BenchNoC**. Characterization of hardened FPGA networks-on-chip and hierarchical network overlays for multi-chiplet reconfigurable systems.

2020–2022 • **DSAGEN / OverGen**. Automated generation of programmable spatial architectures and FPGA overlays, bringing compilation, hardware implementation, and design-space exploration into one flow.

Research Impact

913 citations; h-index 11; i10-index 11. Google Scholar snapshot, September 29, 2026.

Conference Publications

* Equal contribution. Preprints and the dissertation are listed separately.

FCCM 2025

Honors and Awards

2022
- **MICRO Best Paper Runner-up**. OverGen.

2022
- **IEEE Micro Top Picks**. PolyGraph.

2021
- **IEEE Micro Top Picks, Honorable Mention**. DSAGEN.

2020
- **IEEE Micro Top Picks**. SPU.

2019
- **Dean's Fellowship and University Fellowship**. UCLA.

Academic Service

2021
- Artifact Evaluation Committee, HPCA 2021.

2021–2026
- Journal peer reviewer: ACM TACO, ACM TODAES, ACM TRETS, ACM TECS, IEEE TC, IEEE TCAD, IEEE TVLSI, IEEE CAL, IEEE JETCAS, Journal of Systems Architecture, Journal of Signal Processing Systems.

Technical Skills

- **Programming:** C, C++, Rust, Python, Scala, MATLAB.
- **Hardware:** Chisel, Verilog, SystemVerilog; RTL design and verification; FPGA prototyping.
- **Compilers and simulation:** LLVM, MLIR, CIRCT, gem5, Chipyard, Rocket Chip, FireSim.
- **EDA tools:** Synopsys VCS, Design Compiler, IC Compiler; Verilator; AMD Vivado and Vitis.

Earlier Honors and Competitions

2017
- Finalist, Interdisciplinary Contest in Modeling.

2017
- First Prize, China Big Data Modeling Contest.

2016
- First Prize, Data Modeling Contest, XJTU.

2016
- First Prize, Mathematical Modeling Contest, XJTU.
